

UltraSil 810

UltraSil 810 is a soft, high viscosity silicone grease. It is good for metal on plastic, plastic on plastic, or lightly loaded metal on metal contacts. This grease works on slides, cables, and other applications that require a thick film. UltraSil 810 is better able to prevent intrusion of windblown dust into mechanism than most conventional greases.

BASE OIL CHARACTERISTICS		TYPICAL VALUE *
Type		Silicone
Temperature Service Range (°C)		-40 to 150
GREASE CHARACTERISTICS		TYPICAL VALUE *
Thickener		Silica
Color		White
Appearance		Smooth
NLGI Grade		1
Penetration (ASTM D217 / DIN 51804-T1)	Unworked	310-340
Specific Gravity (CTM-2)	25°C	1.16
